

TOGAF Exam Preparation Course

London

TOGAF 9.1™ Training – 2013 – London

Course Overview

Our TOGAF 9.1 Examination Preparation course covers both the Foundation and Certified Levels (Level 1 and Level 2) and proposes as an option a full real-life case study using the MEGA Suite for Enterprise Architecture (EA).

The course duration is either 4 days or 5 days, depending on the option:

- Regular TOGAF Certification preparation course - 4 days
- Access to online EA modeling platform for participation
- Optional: Complete Case Study, brought to you to life using a EA modeling suite - 1 day

This intensive course covers the entire syllabus for the TOGAF 9.1 Foundation and Certified Levels, preparing candidates for the TOGAF Level 1 and Level 2 examinations. The course is enhanced with case studies that demonstrate how TOGAF is used in context. Numerous examples of architecture deliverables and artifacts are provided throughout the course, thus providing candidates not only with theoretical knowledge of TOGAF, but also its practical application.

Sample exam questions and answers for Level 1 and Level 2 are given throughout the course to help better prepare candidates for their TOGAF 9.1 exam. In addition, the course concludes with a full mock exam for both Level 1 and Level 2.

Course benefits

- Comprehensive preparation for the certification exam
- Detailed understanding of Enterprise Architecture and the TOGAF methodology
- Understanding of the role of the Enterprise Architect and EA governance
- Knowledge of EA deliverables and artifacts
- Use of a modeling tool to pragmatically produce EA results
- Use of the TOGAF Architecture Development Method (ADM) for producing EA
- Understanding of how to adapt the TOGAF ADM to different types of architecture engagements and enterprises' contexts
- Understanding of how to incorporate SOA thinking into TOGAF
- Appreciation of the benefits of Enterprise Architecture and how to realise them.

The course will include a variety of teaching methods: lecture sessions, group discussions, group work on a case study, sample exam questions (both multiple choice and scenario based), case study reviews and feedback, and a complete mock examination.

Price: £ 1,350 + VAT per delegate

Early Bird : £ 1,290 when registrants & payments in full are made at least two weeks before the relevant course.

TOGAF 9.1™ Training – 2013 – London

EA Dynamics UK

EA Dynamics UK's public training courses are delivered worldwide and students can view and book courses online. The course is suited to both individuals or can be provided for organisations as an onsite training course. With student numbers kept suitably low we pride ourselves on your learning experience.

We provide TOGAF 9.1 training using accredited and approved Open Group materials- our trainers are experienced in Enterprise Architecture and Business Practice.

Our training approach includes two main training objectives – The first objective is to provide context and clarity to the TOGAF Framework content. We include specific examples and advice on how to pragmatically utilise the various framework components within organisations. We encourage debate on Enterprise Architecture related topics and bring real life scenarios into the mix. We understand that delegates want to obtain TOGAF 9.1 certification so our second objective is to provide a suitable learning environment to help achieve success. We therefore include exam practice and hands on exercises to support your revision. We endeavour to make the volume of materials easier to absorb and less onerous by giving the content more context and also by including a variety of learning techniques and memory joggers to assist delegates achieve exam success.

The course includes TOGAF 9.1 Exam Vouchers, which can be taken at any Prometric Centre Location of your choice, fitting in with in your timeframes and study schedule.

EA Dynamics UK will assist you in your journey to TOGAF Certification. The outcome on achieving TOGAF 9.1 Certification demonstrates you have in-depth Knowledge of the TOGAF framework. The course facilitates learning key Enterprise and IT Architecture skills and techniques, which are recognised as best practice within industry, building your confidence within the workplace and forming an integral part of Enterprise Architecture career development.
